## Irma Fair and Exhibition Aug. 14th-15th is the Next Big Event

### IRMA'S FAIR DAY IS AUGUST 14-15

The sixteenth annual exhibition and fair of the Irma Agricultural society will be held on Tuesday and Wednesday, August 14th and 15th. Entries close on August 11th, and it behooves all who intend to place exhibits at the fair to get them ready and in to the hands of the secretary, Wm. Maason on or before the 11th of August.

A great deal of interest is being taken in this year's fair both locally and by outside exhibitors and from all standpoints the exhibition should be a success.

The directors have arranged for a full line of sports for the second day, and altogether the two days should prove to be educational as well as entertaining to all.

Watch for the posters on a few days.

Monday, the Irma district enjoyed one of the heaviest rains it has had for some weeks. The rain came just in time to help some of the early grain that was beginning to suffer from the hot dry weather. With a few weeks warm weather, the Irma district will be harvesting one of the finest crops that has ever been grown.

Following the wet spell the weather turned quite cold and Wednesday night the thermometer fell to near the danger point, but so far no reports of frost have been given and the cold spell appears to have passed for the present.

### Bank of Montreal Business Summary

Nothing has occurred during the last four weeks to mar the prospect of a bountiful harvest nor to diminish the volume of current business. It may be said, indeed, that conditions commercially have never been better in Canada, nor prospectively have held out greater assurance of reasonable continuance. To this situation excellent harvests of three successive seasons have been an important contributing factor, and prevailing confidence in business circles is founded upon belief that this year's crop yield will at least compare favorably with that of 1927 and may even exceed it given propitious weather during the next six weeks. A larger area has been sown to grain in the Prairie Provinces, the lowest estimate of increase being a million acres and the highest nearly two million acres. There has been adequate moisture with continuous heat, and save an odd exception here and there over the vast territory conditions leave little to be desired.

In the several branches of production and manufacture a substantial degree of activity continues. Mineral output is large with prospects of expansion in the not remote future in respect of gold, copper and lead. Iron and steel manufacturers are well employed; the boot and shoe industry maintains recent improvement. Textile mills hold up under the strain of foreign competition although operating under capacity; distributing trades find business better than of late years; and retail business maintains is volume, to which end a large influx of tourists contributes. Indeed, the latter has become an important factor in summer trade, estimate being made that not less than \$250,000,000 will be spent in Canada by American tourists to redress the adverse balance of trade with the United States. The automobile industry experiences seasonal slowness, but statistics show a production of 29,764 passenger cars in May, a number in excess of any previous recorded month, while the production of motor trucks in the same month, 4,178, has only twice been exceeded. The output of agricultural implements continues on a large scale.

The foreign trade of Canada in June followed the trend of recent months, a small increase in export values being overcome by a much larger increase in imports. Exports of domestic produce last month amounted to \$107,121,000, as against \$105,678,000 in June of last year; imports had a value of \$110,693,000 as against \$101,018,000 the year before. On the export side there was an increment of \$5,740,000

### NEWS ITEMS FROM JARROW

Mr. and Mrs. Norman Luxton returned from their holidays on Monday last. They went by motor to Edmonton, Calgary and Banff and report having had a most enjoyable time.

Bruce Macdonald and family left on Sunday for a short holiday.

Monday's rain makes the crop prospects in this district exceptionally good and a few more warm days will assure record yield on the whole.

We are pleased to learn that Edna Peat is doing nicely and expects to return home soon.

### ALEX ROSS HEADS

**COMPENSATION BOARD**

The appointment of Alex Ross, former Minister of Public Works in the Alberta Government, to the position of chairman of the Workmen's Compensation Board succeeding John T. Stirling who recently resigned on account of ill health has been announced by Premier Brownlee. It is felt that Mr. Ross' administrative experience and familiarity with Workmen's compensation legislation will particularly qualify him for the duties of his new position which he will assume on Monday next.

### NOTICE

The ladies of Strawberry Plain circuit are putting on a Lawn Social at the home of Mrs. R. D. Smallwood on Friday evening, August 10th. Everybody come and show your skill at playing indoor baseball, harnyard golf, Eating Ice Cream, Etc.

In the item of wheat and of \$688,000 in new grain, but in the case of the latter quantity export was, relatively, greater than value export, indicating a slight cut in prices. In the three elapsed months of the current fiscal year exports of \$284,117,000 compare with imports of \$302,766,000, the pendulum having thus swung to an adverse balance. A year ago in the three months' period exports exceeded imports by \$23,071,000.

### Prairie Provinces

Wholesale business generally is normal with sales of hardware and building supplies reflecting the high level of building activity prevalent throughout the Prairie Provinces. Warm weather has stimulated retail trade in seasonal lines. Collections are improving. The wheat market has shown a downward tendency due to the record carryover expected and favorable crop reports; cash wheat on the 26th July closed at 129 5-8 as compared with 163 3-8 a year ago. The livestock market has been firm with prices above those of last year. Sales at the five western stock yards from 1st January to 12th July were as follows, the figures for the corresponding period last year being shown within brackets: Cattle, 141,552; calves, 38,897 (44,853); hogs, 364,531 (392,947); sheep, 15,583 (17,662). The hope of establishing a gold mining industry in Manitoba is proving to be well founded and development work in copper areas is proceeding satisfactorily. Sheep shearing is almost completed in Alberta; a large proportion of the clip has been sold to Boston buyers. About 7,000 acres were sown to sugar beets, or 1,000 acres over last year. Production in the Turner Valley field is approaching 2,000 barrels per day of light crude oil and high grade naphtha.

### WINTER WHEAT

#### HARVEST STARTS

The first report of winter wheat harvesting comes from Chin, near Lethbridge, where on Friday, July 27, five binders started cutting on the farm of John Ross. The crop promises a heavy yield, although reports indicate that the dry weather during the month of May in some southern sections will be reflected in a slightly decreased yield of winter wheat as compared with last year's crop.

Spring wheat cutting is expected to start in about three weeks, as early fields are beginning to color. The prospect of a highly satisfactory yield of this crop is very promising.

Heard at the show Saturday night: "I didn't like that show, the hero and heroine should have married at the close of the picture."

Meek escorts: "Don't you know the public doesn't want sad endings."

### SHOWER FOR Mr. & Mrs. PRIOR

Last Friday a shower and dance was held in Orbindale school for Mr. and Mrs. Earle Prior, who were recently married. A most enjoyable evening was reported by those who went. In the early part of the evening dancing was engaged in by as many as there were room for on the floor. Then just before supper the house was called to order and some instrumental and vocal numbers were given by Mrs. Prothero and Mrs. John McCredie. The violin playing was as good as usual and Mr. McCredie's humorous songs were well received.

A mock trial was then performed. After the newly married couple were called up to the platform, the charge was laid against them that they had fallen in love. They were called upon to plead, and after pleading guilty sentence was pronounced on them by three young ladies who came into the room bearing armful of useful and valuable present. The sentence was pronounced to "Give them these and make them keep house for the rest of their lives." The young ladies were Miss Peterson, Miss Archibald and Miss Della Pollard. Mr. T. Slipper as master of ceremonies made a striking figure in fancy costume and flowing beard.

After the groom had responded by a very suitable and appropriate speech supper was partaken of and then some more dancing finished up and gave the newlyweds a most jolly send off.

Messrs. Coulman and Prosser supplied the music and gave some of the jazziest music you ever heard.

(Note—This item should have appeared in a former issue but was delayed in arriving at our office.)

### A SCHOOLBOY'S ESSAY

"The Gote—a gote is about as big as a sheep if the sheep is big enough. A female gote is called a buttress, and a little gote is called a goatee. Gotes are very useful for eating up things. A gote will eat up more things than any animal which isn't a gote. My father once owned a gote. Everything he says is so, so even if it isn't so. That is all I know about gotes."

Editors are always receiving jokes about being absentminded but these two people have it on the editors: "Absent-minded Lord Husband: "Dear, I believe I have lost the road." "Absent-minded Wife: "Are you sure you had it when you left the house."

### An Empress

The Canadian Pacific liner "Empress of Australia" is Southampton Roads.

From a height of two thousand feet the giant liner looks like a toy boat although her registered tonnage is 21,850 tons and she is one of the largest liners to come up the St. Lawrence River.

### IRMA RESIDENTS VISIT VERMILION

About one hundred residents of Alberta and Orbindale districts, motored to Vermilion Wednesday of last week and took in the Provincial Experimental Farm and School. The party arrived at Vermilion about 11:30 A.M. and had lunch, after which Mr. Elliott, the superintendent conducted them over the different experimental plots and explained thoroughly the different experiments and answered any questions any of the visitors wished to ask. The party had lunch again about 5:30 and started home after spending a very pleasant and instructive day.

It is only by visiting these experimental farms that the most benefit can be derived from them and when the majority of a community decided to take time to make the trip some of the party is likely to bring home some ideas that will help out the whole district in future years.

### ALBERTA EXHIBITS

**FOR AMERICAN FAIRS**

Exhibits of agricultural products and natural resources from Alberta will again be shown this season at a number of the larger fairs throughout the central states by the publicity branch of the Department of Agriculture. Reports from Canadian Government agents indicate that a great deal of interest in Alberta has been shown by farmers throughout the territory visited in this way last year and that immigration to the province has been materially assisted by the favorable impression created by these exhibits.

The fairs at which the Alberta display will appear during August and September include the following: Mississippi Valley Fair and Exposition, Davenport, Iowa; Hawkeye Fair and Exposition, Fort Dodge, Iowa; Blue Earth County Fair, Mankato, Minn.; Freeborn County Fair, Albert Lea, Minn.; Inter-State Fair, La Crosse, Wis.; Missouri State Fair, Sedalia, Mo.; North Central Kansas Fair, Belleville, Kan.; Brown County Tri-County Fair, Horton, Kan.; Kansas Free Fair, Topeka, Kan.; and Kansas State Fair, Hutchinson, Kan.

Mr. F. Peterson of Irma will accompany this exhibit.

### CARD OF THANKS

Mr. and Mrs. W. Maason desire to thank the many friends for kindness and sympathy rendered during their recent sad bereavement; also for the beautiful floral tributes received.

### NOTICE

**IN THE ESTATE OF CHARLES RAY REED, late of the Village of Irma, in the Province of Alberta.**

NOTICE is hereby given that all persons having claims upon the estate of the above named Charles Ray Reed who died on or about the 29th day of May, A. D. 1928 are required to file with Olive Geraldine Reed, Executrix of the said estate at Irma, Alberta, by Friday the 13th day of September, A. D. 1928 a full statement duly verified of their claims and that after that date the Executrix will distribute the assets of the deceased estate among those entitled thereto having regard only to claims of which notice has been so filed and brought to the knowledge of the Executrix of the said estate.

Dated at Viking, Alberta, this 26th day of July, A.D. 1928.

C. G. Purvis, Solicitor for Executrix.

### WEED LOSSES

Weed losses take many forms such as depressed yields, lost labor, lessened land values and dockage losses. Taking all these into consideration those in the best position to judge have placed the weed losses of Western Canada to exceed \$100,000,000, the amount increasing each year. Would Henry Ford or any company tolerate such a tremendous leak? Certainly not! According to the Field Crops Commissioner Alberta's share of the loss is at least \$18,000,000. The annual loss from forest fires, over which we show so much concern by establishing many aeroplane forest patrols, pales into insignificance when compared with these appalling losses due to weeds. The 1927 forest fire loss was estimated to be less than \$1,700,000 for the whole dominion.

### NEWS ITEMS FROM KINSELLA

Mrs. P. J. Wangness' pupils who took the exams from the Toronto Conservatory of Music at Edmonton, passed with first class honors. They were the Misses Betty Cooper, of Phillips, Irene Ross of Viking, and Gertrude Lee of this place.

Mr. and Mrs. Horner who have been spending the past few weeks with their daughter Mrs. Frank Murray, left for their home in Ontario last Tuesday.

Mr. P. J. Wangness spent a day in Edmonton last week.

Mr. D. Corbett is improving the looks of the Post Office and his residence with a coat of paint, also Mr. Frank Murray is having his store painted inside and out.

Mr. and Mrs. D. Corbett and son spent Sunday at Vegreville.

A much needed rain came at last as we had two lovely showers on Monday.

The Misses Margaret, Ina and Patsy Helm of Edmonton spent most of last week at the gravel pit with their father Mr. J. Helm.

Mr. McLeod is the assistant operator at the station here.

### POOL MAKING PAYMENTS

**OF \$34,000,000**

Winnipeg, July 28.—An interim payment of more than \$34,000,000 is being made today to members of the Canadian wheat pool in the western provinces. In practically every district of Saskatchewan, Manitoba and Alberta, pool members will share in the distribution, which is the largest interim payment ever made by the wheat pool.

Today's payment is the second interim one for the 1927-28 crop, the first having been made on March 10.

### TUNNEY QUILTS

New York, July 31.—Gene Tunney, heavyweight champion boxer, announced his retirement from the ring today at a luncheon given in honor of William Muldoon, 82 year old member of the New York state athletic commission.

"I have fought my last bout as professional boxer," his statement said. Tunney declared it his desire to place in Muldoon's hands "a belt or other suitable emblem of supremacy to be awarded by him to that boxer who, through a series of elimination bouts of victories over the most suitable opponents, shall prove himself deserving of it."

### J. R. LOVE, M.L.A. WILL SPEAK

J. R. Love, M.L.A. will speak at the Alberta—August 8th at 8 p.m. Rosberry—August 7th at 8 p.m. Spring Valley (south of Jarro) on August 8th at 8 p.m.

### SPECIALS ADDED TO IRMA FAIR

The Irma Branch of the Women's Institute will give a special prize for the best picture of a farm, to be drawn by a school child in grades 5-6-7 or 8, to be on a drawing pad 9x12 with one inch margin and not colored and not to be copied from any other drawing or picture. The first prize will be \$3.00 and second \$2.00.

A special prize of \$5.00 will be given at Irma Fair by W. Cole for the best pair of chickens hatched from eggs purchased from him. Must be at least three months old at time of exhibition.

### NOTICE

The Gratton Collee Live Stock Shipping Association will hold a meeting at Unity School, Monday, August 6th at 8 p.m.; Rosegarland School, Tuesday, August 7th, at 8 p.m.; and Poplar Hill, Wednesday, August 8th at 8 p.m.; Roseberry School, August 9th, and Albert School, August 10th.

Speakers will be present from the Central Office to address the meetings.

### CHURCH NOTICES AND ACTIVITIES

Sunday, August 5th, 1928  
Subject of address—"Pre-occupation."

Ross—11 A.M.  
Alma, Mater—2 P.M.  
Rosberry—3:30 P.M.  
Irma—8 P.M.

### SUNDAY SCHOOL NEWS

A number of whole families were absent last Sunday, holidaying, no doubt. In spite of this thirty-six were present—twice as many as two years ago.

The following members were present for all the five Sundays in July, Eva Congdon, John Schenert, Ralph Schenert, Morris Wright, Edna Schenert, Orville Wright, Marion Thorpe and Frank Maguire. Credit is given when pupils are away but attend some other Sunday School.

### CHURCH SERVICES

**JARROW—KINSELLA**  
Kinella—11 A.M.  
Batts—3 P.M.  
Jarro—8 P.M.

At the evening service Rev. M. Bailey, a former pastor of Jarro will be the speaker.

—Rev. W. O. McNeil.

### PERCY WILLIAMS WON

#### 100 METRES OLYMPIC RACE

Olympic Stadium, Amsterdam, July 31.—When Percy Williams, Vancouver, won the 100 metre championship at the Olympic games here yesterday it was the first time in history that Olympic honors at that distance have been won by Canada and the second time that a sprint championship resulted in the Canadian flag being raised to the mast head. It was in 1908 that Bobbie Kerr won the 200 metres at Stamford Bridge, England, after being defeated in the final of the 100 metres by Walker, South Africa, and Rector, United States.

### PHILIP NEWS

The football team and girls basketball team journeyed to Hardisty on the 25th where they played in their respective competitions in the annual sports celebration.

The girls met the Hardisty team in the first round and won to the tune of 8 to 1 which brought them a prize of \$10.00. They were beaten in the final game by Lougheed by a score of 6 to 0.

The football team were drawn to play Lougheed who had beaten Phillips on the 24th of May so the rivalry was keen. Revenge was sweet and Phillips came out winners by 2 to 0. In the final game Phillips defeated Hardisty 2 to 1. The football prize was \$40. Thus Phillips established a reputation in the Hardisty district which will be remembered for some time to come.

On Thursday 26th the girls team journeyed to the Bruce Samuels where they had a strenuous game against the Bruce girls. At the end of the third period the score was 5 to 3 in favor of Bruce. The last period created a good deal of excitement and terminated with the score 7 to 5 in favor of Phillips.

The basketball team have arranged a two game series with the Rosberry team, the first to take place there on Tuesday 31st and the second at Phillips on Friday, August 3rd.

### H. H. MILLER & SON OF

#### JARROW TO HOLD SALE

H. H. Miller & Son who have recently purchased the J. C. Cufflet store at Jarro, are holding a big sale for ten days starting August 8th as a means of introducing themselves and to give the buying public some genuine bargains. To encourage as much cash buying as possible they are giving attractive discounts and large reductions in price. Watch for the display posters with prices cut to the bone.

### BLACKIE TEAM WON

#### CAMROSE TOURNAMENT

The semi-professional team from Blackie romped away with the Camrose tournament last week, by winning the finals from Hardisty 17 to 1. Viking was eliminated on Friday by a team of all stars labelled Sedgewick, by the score of 6 to 0, and this same Sedgewick team was whitewashed by Blackie 14 to 0 in the semi-finals on Saturday afternoon. Camrose, Tofield, Batha, and Ponoka were all eliminated the first day. The Blackie team was far above any team at the tournament; only one man scoring against them in three games.

In clean, bright Aluminum

## "Safety First" on the Highways

At the risk of being somewhat tiresome, the writer of this column feels impelled to once again direct attention to the subject appearing as the title to this article. Justification for such action, if indeed, any justification is needed, is to be found in certain well established facts.

In the three prairie provinces last year the number of motor cars registered exceeded half a million.

In all three provinces, Governments and municipalities are straining their resources in the construction and improvement of good market roads and provincial highways, and every mile so constructed or improved results in an increase in motor vehicular traffic and an increase in the speed at which most of the cars will travel.

In the improvement of highways, advances are being constantly made in the direction of making them as nearly as possible "safe" through increases in width, reduction in grades and curves, guard rails at curves and danger spots, and a standardized system of marking the highways, indicating routes, turns, curves, railway crossings, danger spots, etc.

On the other hand, year by year, manufacturers of cars are increasing the power and speed of cars, and with gradual price reductions their use is becoming almost universal. It is true, of course, that four-wheel brakes, and other safety devices, are being added, and manufacturers are interested and active in making their cars as nearly "fool proof" as they can be made.

The fact to emphasize, and which it is important should be drilled into the minds of every motorist, is that no matter what Governments and municipalities may do in the matter of road construction, and no matter how strongly and carefully motor cars may be built and equipped from the prevention of accident standpoint, the human element remains. Neither roads nor cars can be made "fool proof," and the unfortunate fact is that the reckless driver is just as great a danger to others as he is to himself. If the highways of the country are to be made safe, it is evident that there must be a decided change in the attitude and conduct of many thousands of motor car drivers, and the public generally.

In an address before the annual convention of the Union of Saskatchewan Municipalities, Hon. S. J. Latta, announcing the early inauguration of a "Safety First" campaign throughout the Province, stated that he had recently read in a newspaper that someone was either killed or seriously injured every forty seconds in an automobile accident in the United States, and that during 1927 approximately 28,018 persons were killed and 783,700 injured in such accidents. He further referred to the fact that at a conference held in the Parliament Buildings of Ontario it was revealed that 1927 automobile accidents cost 422 lives in Ontario, an increase of 124 over 1926, while 3,976 others were injured. It was further reported that fatalities were in the proportion of eight to each one thousand car licenses.

These are appalling figures and certainly indicate the need of somehow controlling this great modern convenience. What was the cause of these accidents? Were they preventable? The results of investigations in the United States show that 11,769 highway accident fatalities in 1927 were caused principally by motorists, of which 3,765 were caused by inattention, 2,706 as the result of speeding, 2,353 through traffic violation, 1,059 from intoxication, and 1,882 from miscellaneous causes.

About an equal number of fatalities, 11,367 to be exact, were caused principally by pedestrians, of which number 3,638 occurred through children playing in the street or crossing in violation of traffic regulations, 3,069 from adult jay-walking, 1,519 through inattention, 1,591 as a result of confusion, and 1,250 from other causes.

As compared with these more than 23,000 fatalities caused by the human element, there were only 1,290 resulting from fog, snow or rain, 662 from some defect in the vehicle, 558 from skidding, 383 from road defects, 244 from strong lights, 244 from poor street lighting, and 105 from confusion in dimming lights. In other words, physical conditions were responsible for 3,486 fatalities as contrasted with over 23,000 for which people themselves were responsible.

Surely such a record provides ample justification for repeatedly urging people to exercise care, to realize that Common Sense will prevent accidents and should be applied, that the Safe way is the Safe way.

### Prominent Visitors From Ireland

Marquess of Dufferin and Ava Will Make Tour Of Canada

The Marquess of Dufferin and Ava, speaker of the senate of Northern Ireland, who is a son of a former governor-general of Canada, was a passenger on the Empress of Scotland, which arrived at Quebec recently. In a short interview, he declared it was his intention to see Canada from coast to coast on his present stay here. Regarding the industrial situation in Northern Ireland, the marquess declared that, with the exception of a slight improvement in the shipbuilding industry at Belfast, there was little change as compared with a year ago.

Father (to his old friend's pretty daughter): "Good-by, my dear, I won't kiss you, I have such a cold." His son (with alacrity): "Can I do anything for you, father?"

The first typewriter was invented by an Englishman early in the 18th century; the first workable pattern, however, was designed in Detroit just 100 years ago.

## Cuticura Talcum Is An Ideal Toilet Powder

It is pure, smooth and fragrant and contains antiseptic properties which help to ally excessive perspiration. It imparts a pleasing fragrance and leaves the skin refreshed and cool.

Sample Book Free by Mail. Address: Canadian Depot: "Hercules" Ltd., Montreal, Quebec. Write for it. Cuticura Shaving Stick 25c.

### Third Wrigley Marathon

Ernst Vierkötter a Sure Entry in This Outstanding Event

While much dissatisfaction has been expressed by Vierkötter and his manager regarding the shortening of the distance for the Third Wrigley Marathon, again to be conducted by the Canadian National Exhibition this year, there can be no question about his entering as he is daily training in Lake Ontario.

He seems to be carrying more avoirdupois than he did last year, and experts say that he is a little sluggish. This, of course, at this stage of the game, means little. George Young is the size of a young elephant and swims more or less sluggishly in consequence. Both of them will undoubtedly take this off in the course of their intensive training, so that comparisons are more or less impossible at this time.

Vierkötter is a great swimmer and unlike most distance men is fast. Witness his feat of last year when he covered the first five miles under 28 minutes each. That should be fast enough to win this year's Marathon.

From a spectacular standpoint the Third Marathon will surpass the Second. The course will be along the sea wall, and will be in full view of the tens of thousands of spectators who will again flock to see the great event.

The entries are now coming in thick and fast and it is estimated that they will exceed those of last year.

## GUARD BABY'S HEALTH IN THE SUMMER

The summer months are the most dangerous to children. The complaints of that season, which are cholera infantum, colic, diarrhoea and dysentery, come on so quickly that often a little one is beyond aid before the mother realizes he is ill. The mother must be on her guard to prevent these troubles, or if they do come on suddenly to banish them. No other medicine is of such aid to mothers during hot weather as Baby's Own Tablets. They regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

London will add 75 double-decked omnibuses, fitted with pneumatic tires, this year.

A pleasant medicine for children is Mother Graves' Worm Expeller, and it is excellent for driving worms from the system.

### Many Farmers Join Pool

Estimated That About Half the Wheat Crop Of West Contributed By Pool

The Canadian Wheat Pool, which embraces 142,000 Canadian farmers, continues to add to its membership. In a single day this month contracts were received at head office covering a total of nearly 100,000 acres of grain.

Under the Canadian Wheat Pool system farmers voluntarily sign contracts in which they agree to market all their wheat through the Pool for a period of five years. About half the wheat crop of Western Canada is controlled in this way, and sales by the Pool average over a million dollars for every business day of the year. It is claimed that the Pool has increased the price of wheat to the farmer without increasing the price of bread to the consumer.

### Canada's Fox Farms

Forty thousand silver black foxes were registered in Canada from various fox farms during the past year, the report of the Canadian Silver Black Fox Association shows. Saskatchewan registered only 793 of the pups, fox farming in this province not yet having reached the proportions attained in other sections of the Dominion.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without which the growth of the child will be retarded and its constitution weakened.

### Did Not Find Out

A popular Scotch doctor who was very sensitive about his age passed away suddenly. One of his friends suggested to the mourners that the secret would be disclosed on the plate in the casket. But when they looked at it, all it disclosed was:

Dr. Caleb McNabb.  
Office hours from 2 to 4.

Sunburn? Use Minard's Liniment.

W. N. U. 1743

THERE is nothing that has ever taken Aspirin's place as an antidote for pain. It is safe, or physicians wouldn't use it, and endorse its use by others. Sure, or several million users would have turned to something else. But get the real Aspirin (at any drugstore) with Bayer on the box, and the word *genuine* printed in red:

Aspirin is a trade mark. The Bayer cross is a registered trademark. The word 'Genuine' is a registered trademark. The word 'Bayer' is a registered trademark.

### New Settlement Area

District Near Edmonton Made Available By Building Of Branch Line

The penetration of branch lines of railway into the sparsely settled area north and east of St. Paul de Metis has opened up a fertile district 50 miles square.

The district has taken on new life. In 1927 the railway was extended from St. Paul to Elk Point, and this year is being pushed on from Elk Point to Hensburg, a distance of 20 miles. It is expected that steel will be laid from the junction of the St. Paul-Edmonton branch near Ashmont to Hensburg, to miles north-east of St. Paul. This line passes through a country containing many free homesteads and large blocks of high-class agricultural land. Close to this area is the Saddle Lake Indian Reserve, which was taken over from the Indians by the Land Settlement Branch of the Department of Immigration and Colonization, and over 50 families settled thereon. This settlement has proved a most successful one.

### Recipes For This Week

(By Betty Barclay)

#### GINGER ALE LEMONADE

4 lemons.  
1 pint ginger ale.  
1½ pints water.  
1 cup sugar.  
Place a small block of ice in a pitcher. With the juice of four lemons mix one cup of sugar, one and one-half pints of water, and one pint of ginger ale. Pour into pitcher and stir thoroughly. Allow to stand few minutes before serving. (Serves 6 persons.)

#### A REAL MEAL SALAD

½ cup hickory raisins.  
1 cup cold cooked meat, cut in cubes.  
1 tablespoon granulated gelatin.  
¼ cup cold water.  
1 cup boiling water.  
1 tablespoon vinegar.  
¼ teaspoon salt.  
¼ teaspoon pepper.  
Spice paprika.  
1 teaspoon Worcestershire sauce.  
1 cup diced celery.

Pump and drain raisins. Soften gelatin in cold water for 5 minutes, then dissolve in boiling water. Add vinegar, salt, pepper, paprika and Worcestershire sauce. Let cool. When mixture starts to thicken stir in the pumped raisins and the meat cubes. Turn into a cold wet square pan. When firm cut in cubes. Arrange on lettuce. Sprinkle diced celery over top. Garnish with a spoonful of mayonnaise and a dash of paprika.

The Friend of All Sufferers.—Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of half a continent. It is on sale everywhere and can be found wherever enquired for.

When some men bury the hatchet after quarrelling they go right out and dig up an axe.

Granite monuments of the Egyptians were cut with copper chisels.

The confirmed bachelor prefers to settle his affairs out of court.

### Phantom Radios

Device Whereby Radio Fans Can Broadcast Through His Loud Speaker

The genius of Earl W. Davidson, a railway telegraph operator, who likes to tinker around with radio sets in his off hours, has made it possible for the long suffering radio fan to shout his sentiments right into his loud speaker with the assurance that people for miles around will hear his protest.

The workings of the phantom radio, invented by Davidson, are very simple. The effect is to transform any loud speaker into a broadcasting microphone whose waves will ride out into the air on the wave length of the station into which the set is tuned.

At his home at Terre Hill, Penn. Davidson has talked through his receiving loud speaker to his neighbors as far as fourteen miles, getting his words in edgeways during the lulls of broadcasting programmes from Chicago, Pittsburgh and New York.

He says the secret of his invention is in the arrangement of the circuit, in which he uses a crystal and three ordinary tubes.

Davidson came to New York last week to demonstrate the "Phantom Radio." He has gone back home to continue his experiments.

### Marks Alberta's First Mine

Cairn Erected In Lethbridge By Canadian Historical Society

The memory of a father of Confederation and the foundation of one of the most important communities and coal mining areas in the West, was recalled by the celebration at Lethbridge, on July 18. The Canadian Historical Association has erected a cairn in the town to commemorate the opening of the first coal mine in Alberta, in 1872, a period truly remote in the history of the west, before the Canadian Pacific Railway had appeared to open up the country to settlement. In the ceremonies, the Lethbridge Historical Society, the Natural Resources Department of the Canadian Pacific Board of Trade of Lethbridge, and Railway the City Council and others took an interest.

### Donstrated Her Skill

Winnipeg's first and only aviatrix, Eileen Magill, demonstrated her skill by soaring to a height of 8,000 feet with the Winnipeg Flying Club's Moth plane, and tail-spinning for the first time since she took her first solo flight.

### Average Size Of Farms

The average size of a farm in Manitoba, Saskatchewan and Alberta is 258 acres with 147 acres under field crops including 86 acres in wheat, the acreage value is \$14,451.

Corns cause much suffering, but Holloway's Corn Remover offers a speedy, sure, and satisfactory relief.

People who don't spend their money as we think they should are miserly.

## HERCULES

PERMANENT BUILDING PAPER

What's between  
Indoors and Outdoors?

The world is divided into two parts, outdoors and indoors. Between the two lies a problem. The answer has a vital effect on those who are indoors.

If wind and dampness can be kept outdoors, naturally indoors will be comfortable and healthful to the occupants.

You can solve this problem with Hercules Permanent Building Paper. In three grades, x, xx, xxx—Hercules is tested and proven damp proof and wind proof. Test it yourself. A line will bring samples. Write us.

## Highland Gathering At Banff An Annual Function That Is Attracting Widespread Interest

(By C. V. Lane.)

Rupert Brooke, famous British poet who died in the war, visited the Rockies some years ago. Unable to withhold his admiration of their grandiose scenery, he qualified it with the criticism that awe-inspiring as they were, they were without human associations such as the Alps possessed. No man looking at them could imagine the tremendous adventure of Hannibal crossing the snowy laden passes with elephants and the clangor of his mighty army of Carthaginians and Spaniards. The torrent of northern barbarians pouring over their heights to the attack of the falling Roman Empire; even almost in our times, the invasion across the Alps of Italy by Napoleon, are with heights, yet in the last two hundred years has spread itself over the whole earth, although in doing so it has never forgotten its country of origin.

They settled in Quebec, in the Maritimes, and in Ontario, where was comparatively little to remind them of the mountains of their native land. They spread across the Dominion to the Prairies where was much less. Yet whatever nostalgia they felt for the heath and the glens and crags of Auld Scotia, they prospered by reason of that hardness which mountainous country seems especially to breed in its inhabitants. The Rockies attracted them from the first, and many a peak, river and lake has a good

out any remotely similar events in the known history of the Canadian Rockies. He concluded from these facts that these mountains, however beautiful they undoubtedly were, lacked history and so were without a soul.

It is not of course everyone who has this historic sense and it is quite conceivable that the majority of Alpine climbers and tourists never give a thought of Hannibal or Napoleon when they are in Switzerland. They are satisfied with what they find there and they may reason that the centuries of man's history are dwarfed into moments of time when compared with the incalculable age of the mountains themselves. Still, there is something in Brooke's argument. To decorate inanimate objects with his own restless life, has always been a foible of man, and what may have been true when he visited the Rockies years ago, is much less so today. For since that time the Highland Scots have left an indelible stamp upon them.

There are several nations in Europe whose history is inseparable from mountains, as for instance the Swiss, the Tyrolese, the Basques, the Scandinavians. But not one of them is so im pregnably stamped with their atmosphere and charged with their essence as is the Highland Scot. His speech, his music, his outlook on man and things, is tinged, his pleasures and his sorrows are a part of his environment; the one lifted high into the heavens, the other sunk deep in the profundities. A little nation that has always lived in the shadow of the

Highland Scottish name derived from the early adventurers and explorers. But it was reserved for the twentieth century to bind the great mountains of Canada to the people whose whole history is inextricably tied up to the peaks. Gathered together in the heart of the Rockies, at a place with a Scottish name, the first Highland Gathering at Banff was inaugurated last year with such success that it is to be repeated this year, and will be in all likelihood an annual function in the future. In this way have the Rockies found that soul which Rupert Brooke lamented they lacked.

Anyone finding themselves at Banff between August 31 and September 2, next, would easily imagine himself in the heart of the Highlands. Scenery, speech, the skirt of the pipes, the color of the tartans, dances, games, everything that is of the Scot, Scottish, will be there, drawn as by a magnet to the attraction of the mountains. It will be as though the Fiery Cross of old times had been lit throughout the country, but not for war. This time it will be for peace and for the celebration of the age-old songs, the renewal of the old contests with pipes, dances and sports. Reels, strathspeys and laments that are embedded in the history of the race, never to be forgotten while a Highlander treads the earth, will recall the ancient memories of raid and massacre, of flood and fell, of victory and defeat. And the misty mountain fogs will seem to be aureoled with the color and romance of a thousand years of moving history.

### Electricity For Farm Homes

Investigation Is To Be Carried Out On Cost In Alberta

Modern farm houses are to be fully equipped and experimental tests carried on with a view to making thorough investigation into the costs of electrifying the average farm home in Alberta, through the co-operation of the University of Alberta, the Calgary Power Co., and the U.F.W.A.

(Freddy Higgins, of Seattle, is three years old and smokes cigars.)  
"Can't you see that smoking is forbidden?"  
"No. I can't read yet!"—Il Travaso, Rome.

W. N. U. 1743

### Sugar Beets In Saskatchewan

Soil and Climate Favorable To Beets Of Good Quality

The growing of beets for sugar may at some time develop into an important industry in the province of Saskatchewan. The soil and climate are favorable to the growing of beets of good quality. A number of varieties or strains of sugar beets were tested at the Rosthern Experimental Station last year, and it is recorded by the superintendent in his report, issued by the Department of Agriculture, at Ottawa, that the yields were good, and though the green weights were lower than other classes of roots, the dry matter content is much higher and compares very well in this respect. The report contains a table giving the yields of four of the best varieties in a two-year average. The weight of crop ran from 15 1/2 tons down to 12 1/2 tons to the acre, with a sugar content running from 14.75 per cent down to 12.85 per cent.

### Sweet Clover For Cattle Pasture

After Acquiring a Taste For Sweet Clover, Cattle Prefer It To Other Pasture Crops

Cattle apparently have to acquire a taste for sweet clover pasture, but having attained the habit of grazing it they seem to prefer it to other pasture crops. At the Rosthern, Saskatchewan, Experimental Station, a group of heifers that were pastured on bluff lands during the early part of the summer, were moved to a hay field that contained areas of sweet clover, bromine, and rye grass. The superintendent of the station in his report of the station for 1927, published by the Department of Agriculture, at Ottawa, states that the cattle pastured, at first chiefly on the bromine grass, but they gradually went over to the sweet clover until finally they pastured practically all of the time on this forage plant. He notes further that the sweet clover makes an excellent aftermath for dairy cows and heifers.

### May Use U.S. Mooring Mast

Members of the St. Louis air board, who arrived in London after a visit to Holland, said that they had received authority from Secretary of War Davis, of the United States to invite the owners of the English dirigible R-100 and the German dirigible, Count Zeppelin, to use the mooring mast at the Scott Army field, Belleville, Ill., in the event of a flight to North America.

### RAILWAY MAN PROMOTED

E. D. Cotterell, recently appointed general superintendent, Manitoba District, Canadian Pacific Railway, succeeding A. E. Stevens, retired. Mr. Cotterell was formerly superintendent transportation western lines.

### Poultry Improvement

Flock Of High Record Layers Developed At Rosthern Experimental Station

The Dominion Department of Agriculture through the Rosthern Saskatchewan Experimental Station, is becoming an important centre for the improvement of the poultry flocks of the province. The station has developed quite a large flock of high record layers and it is from these that the demand for setting eggs and young birds are being supplied. This station, according to the report of the superintendent, for 1927, has hens that have reached the three hundred egg mark in a year, and the utmost care is being taken to keep the flock up to a high standard of health and production.

### Outspoken Neighbors

The New York Sun says: One of the reasons why Canada and the United States get along in such a neighborly manner is that they have a common habit of saying precisely what they mean. They may not always agree, but at least they understand each other. It is easy for nations of good will to do business on such terms.

In Japan children are taught to write with both hands.

### Barbless Hooks Popular

Lower right—The barbless hooks. Orank Ripley is trying them out on the French River in the other pictures.

The record catches of fish at this popular outdoor resorts at the Nipigon River Bungalow Camp, the McGregor Lake District, reached from East Templeton on the Canadian Pacific line near Ottawa, and Devils Gap Bungalow Camp, at Kenora, are being mostly made with barbless hooks. These permit all, but the largest fish being freed painlessly and returned unharmed to the water, some fish being undoubtedly caught two or three times in a season.

The barbless hook, in which a bend in the wire near the point similar to a kink in a hairpin takes the place of the sharp barb, does not injure the hooked fish, and enables it to be removed easily and returned to the water, sometimes without even fouling with the hands. Contact, explains Orank Ripley, well known sporting writer, causes often more injury than the hook itself. The protective mucus covering of the skin is removed in handling,

and soon after re-entering its native elements the fish contracts a fungus growth on the affected portion and dies as a result. Wetting the hands lessens the ill effect.

The barbless hook requires little more skill than the older variety as it holds the fighting fish almost as surely, although it may be removed without difficulty. It has become widely popular, and is especially adaptable to fly fishing for bass, trout and salmon.

The barbless hook was invented some years ago by a man named Williams, in Ohio, his model having a bend sloping away from the point that caused considerable damage in being extricated. This idea was taken up six years ago by the late "Snail" Bill Jamieson, well known Chicago fishing tackle expert and veteran fisherman, who reduced the angle of the bend so that it was a slight kink and did much to popularize the new humane hook.

## The Economic Recovery From The World War Presents A Most Surprising Historical Fact

### Time To Fight Weeds

July Is Best Month To Destroy Noxious Weeds

Swat the fly, we are told, and the grower of countless thousands is destroyed. The same is true of weeds. One vigorous, healthy, prolific plant will reproduce itself several hundred fold.

The critical period is during July. Mowers, scythes and sickles should be kept busy throughout the month. The roadsides especially should be attacked, and not left, as they often are, until the plants have fruited and seeded down the neighborhood with noxious weeds.

Cutting roadsides and turn weeds before they ripen their seeds is a good control measure. Cutting them late in the season is evading the law, just as costly as doing it at the right time and far less effective.

For their own protection farmers would be well advised to take the matter in hand and see that the roadsides are cleaned up in time to prevent re-infestation. Many farmers make a practice every year of running the mower along the right-of-way in front of their lands and destroying any remaining weeds with the scythe. July should be weed month—a month for killing weeds, not propagating them.

### Canadian Crop Outlook Favorable

Area Larger and Prospects For Higher Average Yield Than In 1927

A preliminary estimate just issued by the Dominion Bureau of Statistics indicates this year's Canadian wheat crop at 23,405,590 acres, an increase of almost a million acres over 1927. The area sown to oats is 13,227,000 acres, about the same as last year. Barley shows an increase and rye a decrease.

The condition of all wheat is given as 102 per cent. of 1927, when the total yield was 440,024,700 bushels. Manitoba, Saskatchewan, and Alberta, which are now the chief sources of the world's wheat supply, all show conditions superior to 1927.

### Winnipeg Newspaper Union

A New Frock For Afternoon Or Evening Wear

Unusually attractive is the frock shown here. In view "A" the sleeves are omitted, and applique work forms an attractive trimming on the bodice and drapery, while view "B" is fashioned of plain material and lace is employed for the shaped yoke, drapery and cuffs. No. 1683 is in sizes 34, 36, 38, 40 and 42 inches bust. Any size requires 5 1/2 yards 39-inch material for view "A"; 2 1/2 yards 39-inch material and 4 1/2 yards 27-inch all-over lace for view "B." Price 25 cents the pattern.

"The economic recovery from the World War is a more surprising historical fact than that of the World War itself; and it is in many ways a more important one." This challenging statement was made by Professor James T. Shotwell, director of the division of economics and history of the Carnegie Endowment for International Peace, with reference to the researches which he has been conducting ever since the close of the conflict on the economic effects of the war in all the countries of Europe and in the United States.

Dr. Shotwell pointed out that the war itself had not quite taken Europe by surprise. It had been long anticipated and prepared for; but as it progressed there were no economists or serious thinkers anywhere in any land, who had any glimpses of the rapidity of recovery from the appalling catastrophe.

The results of the economic survey which the Carnegie Endowment has been making in the different European countries indicate a degree of recovery which shows that modern society is capable of enduring economic destruction far beyond what anyone had thought possible in 1914, or even in 1919. Europe had naturally suffered enormous losses, and yet, in spite of all the destruction of property, the standard of living of the working class is higher now in most European countries than it was in 1914. This does not mean that all classes have been able to hold their own, but the working class has definitely improved its wage standard and conditions of living.

This improvement is not caused by the war, but has happened in spite of the war. All of which shows that there are forces at work in modern industry which are revolutionizing the basis of living. The causes for improvement lie in improved business methods, in scientific management, mass production and an increased technical skill. All of this has taken place with very little regard to politics and much of it in disregard of the most reactionary and uneconomical political programs. The question whether it will continue or how much it may be counted upon is one which any historian would be very slow to answer, if view of the mistakes which have been made in all previous guesses as to the capacity of European civilization, in the U.S. Gilbert's optimistic report of Germany's capacity to pay shows that the world is still upon the upward course.

The scientific researches of the Carnegie Endowment attempt to answer the question, what does war actually do to the economic processes of modern living? The answer is an emphatic negative so far as war is concerned but it has to recognize at the same time that modern civilization has acquired a capacity for adjustment and an economic strength almost incalculable. The fundamental attack upon the war system therefore must remain a moral one for the one irreparable destruction is in human life itself, with the consequent retrogression in moral outlook.

Two new volumes have just appeared in the vast collection of the economic history of the World War, which Dr. Shotwell is directing. They deal with the effect of the war upon Denmark and Norway. An exhaustive series of monographs on Sweden appeared some time ago. A study of these volumes shows how deeply the neutral nations were involved in the blockade and economic struggle.

What a happy world this would be if there were as much enthusiasm at the finish of an enterprise as there is at the start.

Nearly 2,000 tons of fish were landed in one day recently at Grimsby, England.

"You are marrying? It is a good thing that your cook will now have somebody to scold her!"  
"Well, it is my cook I am marrying."—Ruy Blas, Paris.

# Trout and Salmon Await Anglers' Flies

With winter snows dispersing rapidly and ice dissolving into lakes and streams, with the rising of sap and budding of trees, memories of anglers awaken picturing streams where one would wish to fish, days.

When even the deep blue heavens look glad.

And gladness breathes from the blossoming grounds.

The waters of Nova Scotia, New Brunswick, Quebec and Ontario have all their devoted followers waiting for the ice to disappear.

These anglers are always eager to try new fishing grounds, and they will have new waters this year, according to Wm. Barber Hayes, writing in "Outdoor Life and Recreation."

The latest bid for the favor of the sportsman is the opening of part of that famous salmon river, the Restigouche, to any sportsman who can pay a sum for a day's fishing.

Henceforth, it has been impossible for anybody to fish the Restigouche unless he rented fishing water for a term of several years.

Now the province has made it possible for men in ordinary circumstances to put up money enough for the realization of anglers' dreams—a week's fishing for the salmon of the Restigouche in New Brunswick.

the North American continent is more richly endowed with fish and game. The innumerable rivers, streams, lakes and great stretches of forest offer an almost bewildering selection to the man planning a hunting, fishing or canoeing trip. The trout season in Quebec province is from May 1 to September 20 for speckled trout, and from December 2 to October 14 for the lake trout.

Ontario's most celebrated trout country embraces rivers and streams north of Lake Superior whose names many anglers are already familiar with. In this section special bungalow camps are at your service, operated by the Canadian Pacific Railway, they afford every advantage of an outdoor life just slightly lightening the hardships especially for those who wish to have greater comforts than a tent and camp outfit affords. The season here opens May 1. Distant fields are always green, and distant streams appear more green, while pools grow darker as imagination pictures fishing days in spring.

Quebec's trout streams are many and widespread, and are easily reached making them deservedly popular both with Canadian and American fishermen. Satisfying sport is to be had in the streams in the Lake Edward district north of Quebec City. The Province of Quebec has a wealth of attractions for the sportsman. No portion of

When Canadian business men seek to sell their products in other lands, they can hope to control prices. They have to meet competition from thousands of other business men and producers living in other countries. They are faced with fierce world competition in maintaining their hold on export business. To maintain this trade of a billion and a quarter dollars a year and to increase it, Canadians must become acquainted with every legitimate method known to business. They must learn how to pack their goods in the manner desired by the foreign buyer, they must learn how to keep contract dates, how to ship their goods by the most economical and direct route. And perhaps most important of all Canadian goods must always be kept up to the standard of the sample submitted.

The Department of Trade and Commerce, at Ottawa, is doing everything in its power to further this export trade. Years ago a Commercial Intelligence Service was established, and trained trade commissioners sent to the various trade centres. In fact, Canada had the first trained trade commissioners abroad, thus inaugurating a system which has been widely copied. To-day this country has 24 trained trade commissioners in strategic business centres. More men are now in training to go to other places. The government has by subsidy, and other means, obtained first-class shipping facilities to these business centres. The trade commissioners are constantly on the alert, seeking out opportunities for the selling of Canadian products. Whenever they learn that there is a chance of a Canadian order being placed, they immediately communicate with the Commercial Intelligence Service at Ottawa, giving all information they possibly can. This information is the possession of the service at Ottawa is at the disposal of any Canadian producer or manufacturer. This system, the result of many years' experience, is thoroughly organized and working smoothly. To-day the Canadian manufacturer or producer can find out with little trouble, and at expense, if his products can be profitably marketed in almost any part of the world.

So encouraging have results been from the export system adopted by Canada, and so well have Canadian goods been received abroad, that it is fairly prophesied that within a decade Canada's exports will amount to double the present figure. Hon. Mr. Malcolm, the responsible head of this department, has been keeping Canada's people fully informed as to opportunities abroad. To do this he is reaching the people through newspapers, magazines and trade journals.

In addition there was a wonderful collection of revolving transparencies in natural colors, also rows of these were placed waist high around the exhibit. Each transparency clearly told its individual story. In the centre of the building was a pillar around which are life-sized figures of natives of foreign countries in characteristic costumes.

There was produced a working model showing the Banff Springs Hotel in its fairy-like surroundings. Here were seen the Canadian Rockies and the Bow River Valley in holiday mood. This beautiful castle of comfort in the heart of the mountains promotes the urge to see more of the country we live in. "Tiny automobiles tour the winding paths, trail riders start off with their pack horses for snow-capped peaks, and the Stoney Indians, with their squaw seated outside their tepee helped to make the setting realistic.

The Company's latest achievement in hotel construction was displayed in a model of the Hotel Saskatchewan, Regina. Covered wagons in the foreground tell the story of man's advancement since the days when wagons were the only means of crossing the prairies.

Special prominence was given to the new Canadian Pacific Hotel to be erected at Toronto. "The Royal York" which when completed will be the largest hotel building in the British Empire. Much interest is being displayed by the public in this new structure which will rise 28 stories above the street level and will be located directly across from

## Handsome Canadian Pacific Exhibits

(1) The Railway Building at the Toronto Exhibition. (2) A portion of the Canadian Pacific Exhibit. (3) Illustrated data indicating the growth of the C. P. R.

Throwing the spotlight on all its renowned activities, the Canadian Pacific Railway has again achieved success in its exhibit this year at the annual exhibition at Toronto. It is a busy spot for the visitor; for both the artist and the seeker after instruction and education finds in this display a wealth of beauty and learning. Running from the ceiling down to a depth of about four feet was a circular panorama of the Dominion stretching from the Atlantic to the Pacific Coast. This frieze was designed by James Crockett of Montreal and executed by four other Canadian artists. In lovely color-tint it gave an actual picture of the country through which the journey is made. At the base of this panorama the famous all-steel miniature Trans-Canada made its run.

Spread out as on a stage was a large model of the St. Lawrence River with the Atlantic Empress steamships and smaller vessels entering and leaving the docks. In the foreground were picturesque beaver farms and across the river the city of Quebec with its winding streets and the tower of the Chateau Frontenac loomed in beautiful picture.

There was produced a working model showing the Banff Springs Hotel in its fairy-like surroundings. Here were seen the Canadian Rockies and the Bow River Valley in holiday mood. This beautiful castle of comfort in the heart of the mountains promotes the urge to see more of the country we live in. ## Showing Canada her Opportunity in World Trade

Another Striking Advertisement by the Trade and Commerce Department, Ottawa

The various striking advertisements of the Trade and Commerce Department at Ottawa which have appeared in Canadian newspapers from time to time are calculated to create an "export trade consciousness" throughout the Dominion.

It was devised last year by the Honorable James Malcolm, Minister of the Department in question, that Canadians should become more intimately acquainted with business opportunities outside their own country. In order to accomplish this, the campaign of publicity was embarked upon.

Canada's external trade has grown in such proportions as probably few Canadians

HON. JAMES MALCOLM

realize. For instance, in the last fiscal year, ended March 31st, the Dominion's total exports were valued at more than a billion and a quarter dollars, or to be exact \$1,250,456,297. This represents an export trade of more than \$130 for every man, woman and child in Canada. At the beginning of the present century Canada's export trade amounted to less than 290 million dollars.

Another method of gauging Canada's export trade is found in the fact that last year the country's exports of manufactured products alone amounted to about the same as her total production of manufactured products in 1900. In other words, Canada is exporting as much in manufactured articles to-day as the total output of every factory in the Dominion twenty-eight years ago. These few figures may give readers some comprehension of the immense increase in export business.

Most public men and business men, no matter what their politics may be, agree that export trade is possibly the most valuable asset the Dominion can have. Canada's natural resources are so varied and so rich that it would be impossible for Canadians to consume them. Take wheat for example; it is manifestly impossible for 3,000,000 people to consume 400,000,000 bushels, whereas Canada's wheat production is sufficient to supply the needs of the world.

When Canadian business men seek to sell their products in other lands, they can hope to control prices. They have to meet competition from thousands of other business men and producers living in other countries. They are faced with fierce world competition in maintaining their hold on export business. To maintain this trade of a billion and a quarter dollars a year and to increase it, Canadians must become acquainted with every legitimate method known to business. They must learn how to pack their goods in the manner desired by the foreign buyer, they must learn how to keep contract dates, how to ship their goods by the most economical and direct route. And perhaps most important of all Canadian goods must always be kept up to the standard of the sample submitted.

The Department of Trade and Commerce, at Ottawa, is doing everything in its power to further this export trade. Years ago a Commercial Intelligence Service was established, and trained trade commissioners sent to the various trade centres. ## CONVENTION WAS WELL ATTENDED

(From The Viking News)

The Eighth Annual Convention of the Sedgewick Provincial U. F. A. and U. F. W. A. Convention was held at Viking on July 25th, 1928. C. P. Hayes of Strome was elected chairman. This convention was one of the best held in the district and a large number of delegates and visitors were in attendance.

The Convention was addressed by Mrs. R. Price of Stettler U. F. W. A. director, who outlined the health and hospital work of the Province. J. E. Brown of Castor, U. F. A. director outlined the future of the organization. A. G. Andrews M.L.A. gave a resume of the business done by the legislature during the past session which was listened to by all present. At the close of his address a hearty vote of thanks along with an expression of confidence was tendered to Mr. Andrews.

J. J. Strang a director of the Wheat Pool gave a very interesting address outlining the operation of the Alberta Wheat Pool which was listened to with great attention.

The following officers were elected: C. P. Hayes, of Strome, President; Mrs. E. Hallum of Sedgewick, 1st Vice-President; W. N. Bates, of Alliance, 2nd Vice-President; F. Grandage, of Loughheed, Sec'y-Treas.; Directors, north of the C. P. Track: F. E. Hanson and R. Ash of Viking. South of the C. P. Track: Mrs. B. M. Rombough of Merna; J. L. Lewis of Killam.

A public meeting was held in the evening when the hall was filled to capacity. W. T. Lucas, M.P. was the first speaker and gave a very interesting address dealing with the work of the last session at Ottawa.

Premier Brownlee who was advertised to be present was unavoidably absent, his place being filled by the Hon. Geo. Hoadley who spoke chiefly on health outlining the work of the Hospitals and Clinic in the Province, and was followed by all present with great attention.

A pretty wedding was solemnized on Sunday, July 22nd at 2 o'clock p.m. when Miss Alice Fullerton of Viking was united in marriage to Mr. Casper Peterson of Viking district. The wedding took place at the Peterson home south of Viking, the Rev. Mr. Boe officiating.

The bride was dressed in white Georgette with veil to match held together with pink and white carnations. The bridesmaid, Miss Mabel Fullerton was dressed in a pink Georgette beaded dress. Peter Peterson, brother of the groom acted as best man.

They have gone to Vancouver on a honeymoon trip.

As a result of the moonshine drinking party at Bruce on July 26th in which Steve Khan, of Bruce district, met his death after drinking some of the concoction. Mike Loda, aged father-in-law of the deceased, has been committed to stand trial for the murder.

At the police court held here on Saturday by Police Magistrate Meredith, a number of witnesses were examined, and from the circumstantial evidence adduced, it was sufficient to send the accused up for trial for murder of the deceased.

Mr. White, barrister of Holden, appeared for the accused, while the prosecution was conducted by Const. Miller, assisted by detective Levan, of the attorney general's department.

The case has attracted wide interest and the town hall was crowded during the preliminary trial.

Today, August 1st, is the last of the weekly half holidays. It is very likely that the stores will close for a couple of hours during the afternoon of Thursday, August 16th, the day of the Viking Fair.

O. M. Bird, former assistant principal of the Viking schools is a visitor in town today.

## Viking

Thos. Sorenson has received word from his nephew Luther Sorenson who was here last month on a visit, that he reached New York safely on his motor cycle which has been shipped to Norway, and that he expects to visit in the old country for some time. He left Los Angeles in May and arrived here May 18th, and after visiting here about five weeks continued his journey to New York where he arrived July 7th.

The German police dog that jumped from the Johnny J. Jones show train last Sunday near Bruce was found by J. Mauritz in the S. C. Helfrich wheat field last Monday. The owner stopped off and came back here to look for it and was pleased to give Mauritz \$25 reward for finding the dog.

Word has been received from Mr. and Mrs. J. H. Cartwright that they reached St. James, Minn., and that their little old Ford ramblid right along.

The Viking baseball tournament on July 25th proved a fizzle, both in games and attendance. Out of three outside teams billed to be here, only Verreille showed up, that is the Verreille Juniors. The first game proved a fiasco. For the second game, the two teams chose sides, but this was not much better. The tournament was a disappointment to the players, manager, and fans.

The funeral of George Baikie, who died at the local hospital on Tuesday, July 24th following an operation for intestinal complications, was held on Thursday afternoon July 26th at two o'clock from the Hennessy undertaking parlors. Rev. Mr. Bainbridge, of the United church, held a short service in the presence of a few relatives and friends after which burial took place in the Viking cemetery.

The deceased, George Baikie, was about 44 years of age at the time of his death. He left his home in Scotland on June 29th to seek employment in western Canada. He worked four days at the R. K. Kennedy farm when he was taken ill and brought to the local hospital suffering severely. He passed away following an operation.

The deceased was a veteran of the Great War having served three years in the Palestine campaign. He leaves his aged parents in Scotland, several brothers and sisters there, and one sister, Mrs. Mearns, of Ardrossan, to mourn his death. Mr. and Mrs. Mearns were here for the funeral.

Six members of the local G.W.V.A. acted as pallbearers.

The Elks are completing plans for the erection of the proposed Community Hall to cost in the neighborhood of \$10,000.00. An intensive campaign will be begun in a few days to sell shares. It is hoped that the work of construction will get underway by the 1st of September.

A scheme of financing has been drawn up that should put the proposition over and not be a hardship on anyone. It is proposed to spread the payments as follows: 25 percent Sept. 1st; 25 percent November 1st; 25 percent February 1st, 1929; 25 percent May 1st, 1929. As much cash as possible is recommended to accompany applications for shares. Each member of the Elks-Lodge is constituted a selling agent. Watch the boyat go.

Lloyd Stonehocker, of Meadow Lake Saskatchewan, has been a visitor at the home of his sister, Mrs. E. B. Hummel. It is eight years since Mr. Stonehocker was here and he notes many improvements in this community.

Mrs. O. Fitzmaurice and children left on a motor tour this morning bound for points in Saskatchewan and Minnesota and expect to be gone about two months.

The Misses Dorcas and Merle McFarland, of Tilsonburg, Ont., are visitors at the home of Mr. and Mrs. H. M. Hilliker. They left Tuesday evening to spend a few days at Jasper Park.

Mr. and Mrs. J. L. Slavik and family returned Tuesday evening from a motor trip to Oklahoma and Nebraska. On the return journey they visited Yellowstone Park. They covered over 600 miles in thirty days travel.

Walter Watkins returned to Calgary Tuesday evening after a short stay at the home of his sister Mrs. Steve Jones.

George Loates and son Leonard visited at the Olds school of Agriculture last week and report a very pleasant trip.

G. G. Leferard has returned from a visit to Kalispell, Montana, where he formerly resided before coming to Alberta.

Mr. King and daughter Miss Irene of Macklin, Sask., are guests at the A. McGuire and J. J. Poole homes for a few days.

Dr. McClurg, dentist of Tofteld, will be at room 14 King Edward hotel, Viking, every Tuesday for professional services.

The rain on Monday was what you would call a real million dollar rain as it has practically assured the crop for this year.

## Good Type Of Settlers

C.N.R. Placing Many Families  
Through Their Land Settlement Plan

During the first six months of this year, Canadian National Railways have, through their land settlement association, placed 1,359 farming families on 243,272 acres of land along the lines of the company between the Great Lakes and the Pacific Coast, according to J. S. McGowan, Western Manager of the Colonization Department, and F. J. Freer, Superintendent of Land Settlement for the company. The figures represent a substantial increase over the corresponding period of 1927.

The type of settlers has been chiefly British, American and Northern European stock. Under the land settlement plan of the Canadian National Railways, it has been necessary for them to bring sufficient capital to enable them to make a start on farms of their own, and the amount of such capital brought in by these people this year is estimated to be approximately a million dollars. Settlement has taken place principally in the less developed districts in the northern parts of Manitoba, Saskatchewan, and Alberta where the land can either be homesteaded or where partially improved farms can be had on easy terms.

Statistics for the present year show an increase of more than 2,000,000 acres sown to field crops. This increase is due to the large amount of new land placed under cultivation last year, and to the stimulus supplied by new land settlement.

## Winnipeg Newspaper Union

On leaving the farm the party received a surprise invitation from Baron van der Neergaard to visit his home and farm, an experience which was much enjoyed. The Baron, who is farming a large acreage, was able to show the party a beautiful and a particularly fine herd of cattle.

The visit to the "Landrace" pig breeding establishment revealed something of the secret of the remarkable uniformity which characterizes the Danish hog. Here it was found that the secret of the quality obtained by crossing the pure Yorkshire type with the Landrace pig, a hardy native breed which is in itself a cross between the Yorkshire and a desirable for bacon. Today breeding centres are maintained in different parts of the country, such as Yorkshire, and others for the Landrace from which the Danish farmer is able to buy pure breeds of both types for crossing purposes. The Daasstrup station which we visited is the oldest, largest and best in Denmark.

Back in Esbjerg, we were introduced to one of the most remarkable achievements of the Danes. The loss of so much valuable territory to the Germans in 1864, gave Denmark the choice of emigration or an attempt to reclaim to agriculture one of the large sea vast stretches of practically uninhabited country. These were the sandy wastes along the West coast of Jutland, where for miles inland no human habitation was visible. Such of the land as was not pure drifting sand was covered with gorse and heather.

The Danes bent their energies to reclaim the land with the result that today there are 350,000 acres in pine forest and 1,200,000 acres—nearly two-thirds of the total original heath, have been reclaimed by tree planting.

Time did not permit us to visit the older plantations, but a trip to one of the ten to fifteen years old plantations outside Esbjerg, filled us with amazement. A sandy, wind-swept, barren, sour plain there had been turned into a productive and beautiful country, thousands of acres of which are pasture land, capable of supporting a fair live-stock population.

A trip to Ribe, the oldest town in Denmark, with quaint and narrow streets, then a farewell on behalf of the citizens of Esbjerg, completed our stay in Denmark, a gallant trip to the country which we left with regret. Our sincere appreciation was telegraphed to the Prime Minister and through him to the people of Denmark.

Little need be said of the return voyage across the North Sea except that, for the first time, there was a reduced attendance at the dining table.

London again! No place like London! After all, it was good to hear around us mother tongue, even if spoken with a different accent! Our first morning was spent at leisure, but in the afternoon we had the honour of a reception by the King and Queen and tea at Buckingham Palace. If we had felt some trepidation, it would have been excusable, but how little need for any such feeling. The shyest person would have been put at ease by the kindness of the King, the graciousness of the Queen. Her Majesty had been indisposed for some days, and the royal party had only arrived less than one hour before from Sandringham, nevertheless she insisted on meeting the Canadian farmers.

My dress ornamented by a maple leaf brooch which had been presented to her twenty-seven years ago when she visited Canada, as the Duchess of York. His Majesty was thoroughly interested in the Danish tour and asked many questions about it. This was the crowning honor in a tour already rich in privileges accorded.

Our next engagement brought us to a sphere in which we were the experts. This was our visit at our

The good luck of their friends worries some people more than anything else.

## Farmers' Marketing Tour

Canadian National Railways' Tour  
To Great Britain and Denmark, 1928

Continued.

In the evening, as guests of the Danish Government at a performance of Faust, in the Royal Opera House, we renewed our acquaintance with Mr. Millington Drake, whom we shall remember, not only as the worthy representative of the British Foreign Office in Denmark, but as the Canadian and the Canadian Farmers' Party. Sitting with us Mr. Millington Drake entertained us with a resume of the opera for those who were not familiar with the great work. During the evening we were honored by the appearance of the party calling at the palace to the Royal Book, which is the Danish equivalent of our Canadian edition of leaving cards, an experience which King telegraphed Mr. Millington Drake, as follows: "Please thank the Canadians for the visit to the Queen and me. We hope they will keep a pleasant remembrance of their stay in Denmark."

Before leaving Copenhagen on our return to Esbjerg, we had two important calls to make at the Kalle Kalle Red Danish Cattle breeding farm, and the Daasstrup Landrace pig breeding station.

The Kalle Kalle farm, owned by two Zealand farmers, has been responsible for many interesting and successful breeding experiments. The herd of 70 pure bred Danish Milch cows, which we viewed with some remarkable uniformity, and noteworthy for their high butter fat test and their copious milk and spring of milk.

On leaving the farm the party received a surprise invitation from Baron van der Neergaard to visit his home and farm, an experience which was much enjoyed. The Baron, who is farming a large acreage, was able to show the party a beautiful and a particularly fine herd of cattle.

The visit to the "Landrace" pig breeding establishment revealed something of the secret of the remarkable uniformity which characterizes the Danish hog. Here it was found that the secret of the quality obtained by crossing the pure Yorkshire type with the Landrace pig, a hardy native breed which is in itself a cross between the Yorkshire and a desirable for bacon. Today breeding centres are maintained in different parts of the country, such as Yorkshire, and others for the Landrace from which the Danish farmer is able to buy pure breeds of both types for crossing purposes. The Daasstrup station which we visited is the oldest, largest and best in Denmark.

Back in Esbjerg, we were introduced to one of the most remarkable achievements of the Danes. The loss of so much valuable territory to the Germans in 1864, gave Denmark the choice of emigration or an attempt to reclaim to agriculture one of the large sea vast stretches of practically uninhabited country. These were the sandy wastes along the West coast of Jutland, where for miles inland no human habitation was visible. Such of the land as was not pure drifting sand was covered with gorse and heather.

The Danes bent their energies to reclaim the land with the result that today there are 350,000 acres in pine forest and 1,200,000 acres—nearly two-thirds of the total original heath, have been reclaimed by tree planting.

The London Hunt and Country Club is widely known for the excellence of its afternoon teas. For several years this progressive club has used no other tea but Red Rose Orange Pekoe—a blend that leads all others in flavor and full-bodied richness. Put up only in bright, clean aluminum packages.

Brandon, Suffolk, to the Ministry of Labor's Training Farm for Overseas Settlement, when we were asked frankly to give our impressions of what was being done to transform groups of unemployed young men into farm workers for Canada. Here on the beautiful Westing Hall Estate was the most interesting and the most hopeful experiment we had seen. One of the biggest problems which are Britain's legacy of the war and of post-war conditions, is that of knowing what to do with the able-bodied, willing young men for whom there is no employment and for whom there is at present no recourse but the "dole" which it should be a preliminary training and so often believed in Canada, but is available under the national scheme of unemployment insurance. The Ministry of Labor's training scheme is one of the ways out. Young men desiring to settle in the Dominions, are given the opportunity of being sent to the particular Dominion to which they hope to go. Others are given training and work for three or four occupations in the Old Country. The group which we visited was being trained for Canadian farming. With Canadian implements, they are being taught, by men with Canadian experience, hitching, harnessing, ploughing, mowing, the use of the axe and of such tools as are employed in general handwork.

(To Be Continued.)

Canada Colonization Association  
Hope To Place 3,000 Families On  
Land This Year

The Canada Colonization Association hopes to record this year the placing of 3,000 families on privately owned farm lands in Canada. It is now within about 300 of this figure, according to T. O. F. Herper, manager of this subsidiary of the Canadian Pacific's Department of Colonization and Development. Since its inception on January 1st, 1925, the Association has placed 2,679 families on 650,357 acres; this year's contribution to the end of May, being 255 families settled on 61,114 acres. Great Ontario now being included in the circuit of the Association's activities, the placements for the present year, up to May 31st, run as follows: Ontario, 71 families placed on 2,611 acres; Manitoba, 57 families on 20,132 acres; Alberta, 88 families on 25,852 acres; and British Columbia, 25 families on 1,339 acres.

## Homestead Entries

906 Homesteads Taken Up In Four  
Western Provinces During May

Homestead entries for Dominion lands granted in the four western provinces during May, totalled 906, as compared with 640 for the same month last year. By provinces, Manitoba recorded 44, as against 71 for May, 1927; Saskatchewan, 266, as against 287; Alberta, 517, as against 265; and British Columbia, 79, as against 17. For the five months of the current year entries totalled 3,885, as compared with 2,148 for the smaller period of 1927. By provinces, Manitoba recorded 297, as against 375; Saskatchewan, 1,221, as against 1,038; Alberta, 2,249, as against 810; and British Columbia, 295, as against 37.

A man always thinks that appearances are deceitful when they are against him.

No one is truly law-abiding until he has learned to rule himself and to obey the voice within.

Scotland will have a modern dialect dictionary.

HE DIDN'T THINK  
DYSENTERY  
COULD BE RELIEVED

Mr. John Melling, Finner, Alta., writes: "I am a returned soldier and when I came home from overseas I suffered greatly with dysentery. The doctors and my own medicine did not think it could be relieved. However, he doctored me for quite a while, but did me no good. One day the druggist asked me if I had tried

## IS VISITING CANADA

Hon. Ian Baird, an Oxford student, son of Lord Stonehaven, governor-general of Australia, who arrived in Canada a few days on the White Star liner "Albertic" to spend his summer vacation "mucking" in mines at Amos, P.Q., and Timmins, Ont.

## Small Cattle Shipment

Enterprising Shippers Are Taking  
Chance On British Prospects

Overseas cattle shipment prospects may not be at all bright at present, but at least there are enterprising shippers who are taking a chance upon the British prices netting something for them. Last week the second cargo of cattle this year left Montreal on the Anchor cargo liner Carmia. It was not a large shipment compared with those taken in the early days of the trade from Montreal, but was more in the nature of a trial-shipment like that of the previous one a few weeks ago, which the Manchester Regiment carried. The present shipment consists of 100 head of Shorthorns consigned by E. Maybee, of Toronto.

The Carmia was formerly a passenger boat, and in that capacity made many visits to Montreal from the old land in bygone days. A few years back when the tide of cattle exports had not turned southward across the border owing to an advance in prices it was planned to equip her for that trade, but her life in the cattle trade was very short as the trend of the English market made exporters look across the border for their market. Few, if any, shippers care to make any favorable comments about the possibility of sizeable shipments of cattle again from Canada to Great Britain.

## Rush For Canadian Lands

Homeseekers Are Pouring Into The  
Peace River Country.

With crop prospects bright and a host of settlers seeking farm lands in the Peace River District, a large number of the Peace River District predict a year of rapid development.

Every train into Peace River and Grande Prairie has its quota of land seekers and along every trail are to be seen many motor cars with homeseekers as well as pack laden men on foot. According to a recent report this is one of the greatest land rushes of Canadian history.

A month of rains followed by bright sunshine has given the farmers ideal growing weather and crops are showing excellent promise. At Little Prairie, north and east of Peace River Crossing, wheat is knee high and is heading. Conditions are the same along the bench country at Halfway river and about Rolla.

## Extending Air Service Westward

Contracts As Far As Winnipeg  
Planned For Next Year

A gradual extension of the air mail services now successfully operating in the east to the west is contemplated by the Post Office Department.

Flyers have started out to determine the best route for a service between Montreal and Winnipeg and whether aeroplanes or hydroplanes are the best adapted to the service. Contracts as far as Winnipeg are planned for next year and the department has in view later an extension of this service across the prairies although to that end no definite steps will be taken for a while.

## To Honor War Heroes

Hungary is to honor its war dead with a monument which will be erected to the fallen heroes, and at the same time will express belief in a Hungary to be reunited some day. The 1,000-year-old country will be typified by a single, huge, unadorned stone. On the stone will be chiselled the figures 1914-1918 and 658,000—the number of Hungary's war dead. There will be no other inscription. The monument will be erected in Budapest before the Millennium monument.

One Hundred  
Years Hence

British Scientist Has Ideas About  
Conditions In Next Century

Dr. E. E. Fournier d'Albe, the British scientist, has presented a million sensation with his lecture on the future of women and their dress. Dress materials will be made exclusively of cotton a hundred years hence, he said, but it will be cotton glorified beyond recognition by chemical treatment, such as has already supplied us with artificial silk.

Linen will have disappeared, killed by the advent of nitro-cellulose paint and the disappearance of linseed oil. Materials will be made to combine the strength of calico with the transparency of chiffon and the softness of tulle. For swimming and other sports costumes will be made of paper or will, perhaps, be sprayed on the skin to make a perfect fit. Several methods of doing so are already known to chemistry.

A hundred years hence the servant problem will be forgotten because the servant will be no more. Wireless will be compulsory in every household and universal. The compulsion will be of the same nature as that which forces every citizen to read a newspaper these days. Houses will not be built of brick, but of glass, or else of some other transparent material so that when occasion arises it will be possible to light up the house with all the daylight available. The garden of the next century will be a wonder and a joy. The mastery of man over the vegetable kingdom will be so advanced that it will be open to everyone to grow gorgeous flowers and new kinds of fruit.

## Has Many Valuable Curios

Coins and Books Make Collection Of  
Edmonton Woman Valued

The collecting of old coins is a hobby that perhaps not many women indulge in, but Mrs. E. G. Chase, of Edmonton, has a varied and valuable collection, as well as some very interesting and rare old books. Among her coins are included two Roman coins of the reign of Augustus, Romanus Pater; a New Brunswick halfpenny of 1813; United States copper of 1842; and copper of George IV. reign.

Mrs. Chase also has a copy of the London Times, November 7, 1805, with an account of the battle of Trafalgar and the death of Lord Nelson. Another possession of Mrs. Chase is a miniature history of England from the time of William the Conqueror to the coronation of Edward VII., in 1901. It is only one inch square and printed on very fine paper. "The Chimes," by Charles Dickens, printed in a book one inch by one and one-half, is also a valued possession. A frontispiece shows the new House of Parliament at that time.

The man who never has any trials and tribulations is unable to appreciate happiness.

Don't Make a Toy  
Out of Baby—  
Babies Have Nerves

By RUTH BRITAIN

Much of the nervousness in older children can be traced to the over-stimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Frivolous, crying, and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you have seen what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep, yet it comes no drugs or opiates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhea, constipation, gas, stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 100 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

### CHAPTER XXVIII.—Continued.

Helmi slept the sleep of utter exhaustion, for when she awakened the gray dawn was showing at the mouth of the cave. She looked around for the dog, but she was gone. The pain in her breasts was like a thousand knives twisting and torturing her, and a cry of utter anguish broke from her lips.

Then she remembered the horror of the night before and the terrible deed she had done. She saw again that face of fright and heard the scream.

She went to the mouth of the cave and saw below her the river, running so fair and peaceful and serene. The early morning light, platinum gray, was lying gently on the river's bosom, from which soft little veils of mist were ascending. Helmi shrank back from it in fright, remembering the man who had buried his troubles in its treacherous depths. She clung to the side of the cave pleading with the river not to tempt her. Watching its current she seemed to see Jack's face again gliding away from her. Then came little Lili's face, so cool and peaceful and smiling, with no more fever or pain, and an irresistible impulse to cool her burning, tortured breasts, in the quiet green waters of the river drove her forward.

For one brittle moment she swayed toward the stream. Then something bounded against her, throwing her backward to the grass, and her friend of the night was beside her, whimpering, whimpering with a tenderness that Helmi knew, for it spoke a universal language. She crawled back in the cave, wide awake now, but writhing in her misery. Then came Cleo, the dog, with something in her mouth which she laid in Helmi's arms—a little furry, cuddly puppy, with a fat little body and cool, soft, eager, questioning lips.

## FARMER'S WIFE GETS STRENGTH

By Taking Lydia E. Pinkham's Vegetable Compound

Wilton, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound with me in the newspaper you ad about the Vegetable Compound. It gives me relief and I have told others what it does for me. I am willing for you to use my letter if you choose."—Miss D. B. PETERS, Wilton, Ontario.

Ask Your Neighbor

W. N. L. 1743

Is yours. You and I will never part, and your pups are welcome, too. Come on!" Cleo came in, with a pup in her mouth, smiling as broadly as she could without altogether dropping the pup.

The dog's hunger was pathetic. All the more because it tried so hard not to appear ravenous. This was evidently her first good meal for several days. The puppies, tired out by their adventurous night, were soon fast asleep in a box in which Helmi had placed an old coat of Jack's, and in which they curled up into an indistinguishable mass of sable and white wool, with only one little round head showing.

When Cleo had eaten her breakfast she stood at attention, her eyes fixed on Helmi's face, as if she were trying to read her mind.

Helmi patted the dog's head. "Take a sleep, Cleo," she said, kindly; "when I get my house cleaned up and my clothes dried I will tell you all my plans. I do not know where we are going to live, you and I and our families, but I know we are going to live together. I heard many times in the city that no one wanted a girl with a baby, so I suppose a girl with a baby and a dog and three pups is not wanted either. But still I have faith in God, Cleo. He always helps. Now lie down and be happy; we have enough here for a few days."

Life had changed for Helmi. The demon of revenge which had embittered her heart had been laid to rest by the hand of God, her friend. In her simple theology God had actually reached down His hand through the blackness of the storm and struck the magistrate dead, because he had brought such evil upon her, and to prevent her from committing the crime of murder. God would be her friend forevermore; she would trust Him now whatever came. She had now no more fears for her baby. Lili was in God's keeping—God and the brown-eyed nurse who had spoken so kindly to her.

After a couple of hours of vigorous work Helmi had her house spotless again. Then she lay down to sleep, for a delicious weariness had come over her, and with it a sense of security and peace such as she had never known in all her life before, "Home and God," she murmured to herself drowsily. "Now, I can sleep."

It was the middle of the afternoon when Helmi awakened. Cleo was sitting beside her, watching her. The pups were still sleeping. She sat up, shaking out her golden hair. The fire had died down but the house was pleasantly warm.

Outside the sun shone brilliantly, and Helmi went out to inhale the delectable odors of spring. How she had missed this in the city! But here it was as poignantly sweet as ever. The wind from the river brought to her the medicinal tang of the Balsam of Gilead, pungent and healing, and Helmi's heart responded to it with a rush of love, for she remembered the brave mother used to make of the buds, boiled with clean white lard on the stove, strained through a white cloth and put away in little glass pots for use all the year. As she breathed in the odor reminiscent, from the woods behind the station came the liquid notes of the meadow lark.

(To Be Continued.)

### Might Be Good Idea

Germany Has Suggestion For Checking Reckless Motorist

To check the activities of motorists who travel at reckless speeds, it is suggested in Germany that all drivers should be compelled to install a device that makes a red light glow as soon as the legal speed limit is exceeded.

This idea has apparently followed an invention of a German engineer, who devised a radiator cap light to warn pedestrians at night of the speed at which a car is approaching. Several lights are arranged as a radiator ornament, and for each ten-mile-an-hour increase in speed a different light flashes. At sixty miles a red light glows as a warning signal.

### Work Horses Eat Most

How much does it or should it cost the farmer to feed his horses for a year? The answer is found in the report of W. H. Gibson, B.S.A., superintendent of the Indian Head Experimental Farm, for the year 1927. The figures follow: Brood mares, \$43.45; work horses, \$76.04; three-year-olds (working), \$49.91; two-year-olds, \$36.11; two-year-old stallions, \$77.65; yearling stallions, \$48.50.

### New Farmers For Saskatchewan

New farmers to the number of 1,872 were added to Saskatchewan's population during the past year and according to Evan's Statistical Service. The province's greatest increase was reported from the northeastern portion from Humboldt to Melfort, and east to the Manitoba line.

### Another Television Test

Demonstration In New York Shows Big Advance Made

The day when radio owners can tune in on sporting events and other happenings of interest and see them instead of merely hearing an announcer's description, has moved one step closer.

The Bell Telephone Laboratories demonstrated their improved sunlight television apparatus which showed several full length figures as they moved about an area roughly the size of a boxing ring. Previously television had been restricted to recording no more than a head and shoulders.

At the demonstration a man served tennis balls, drove a golf ball, boxed with a companion, and went through other motions. The action was shown in perfect detail on a screen about two inches by three.

The television images were as clear as the average movie and were marred only by an appearance of being under a paper thin sheet of water moving slowly upward across the picture. This defect, engineers believe can be eliminated.

The new television was developed by Frank Gray and Dr. Herbert E. Ives of the Bell Laboratories.

### Discouraging Swarming

Method That Has Proven To Be Very Satisfactory

A method tending to discourage swarming has been tried with success at the Charlottetown Experimental Station of the Dominion Department of Agriculture. The plan is to add a shadow super of drawn cane immediately there is evidence of swarming. Being given increased room the bees were found usually to settle down and start building queen cells in this new and less crowded area of the hive. In due time it was found necessary to inspect the hives and to watch for the queen. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

### Fresh Supplies In Demand.

Wherever Dr. Thomas' Electric Oil has been introduced increased supplies have been ordered, showing that wherever it goes this excellent oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

### Makes Mineral Discovery

Woman Finds Copper Pyrite In Northern Manitoba Field

For the first time in the history of Northern Manitoba, a woman has made a mineral discovery of major importance.

Miss Kathleen Rice, graduate of the University of Toronto, and well known by pioneer prospectors in the northern mining field, is the fortunate woman, and according to those who have examined the sample of the ore recovered from her cabin, she has made a rich strike.

The find, which is copper pyrite, was made near the northwest shore of Lake Wekusie, on Rice Island, about 1,000 feet in length, 25 miles from steel on the Hudson Bay railway. The island, which has served as a landing place for thousands of prospectors, was known to contain ore, but mining men had doubted its value.

Miss Rice, with another prospector, known as Dick Woosley, has been conducting drilling operations on the property for some time. Yesterday she arrived at The Pas with a sample of ore recovered, which geologists pronounced as "first class" find. The ore was struck about 100 feet below the surface and according to Miss Rice, has been traced along a vein more than 100 feet in width.

A miniature stampede was launched toward the district as soon as knowledge of the strike became general. Miss Rice reported that she had already received alluring offers for her claim by several leading Canadian mining interests.

Minard's Liniment heals cuts, bruises, etc.

### Little Helps For This Week

"Let all those that put their trust in Thee rejoice; let them also that love Thy name be joyful in Thee."—Psalm v. 11.

I know He is, and what He is. Whose one great purpose is the good of all. I rest my soul on His Immortal love and Fatherhood. And trust Him as His children should.

—John Greenleaf Whittier.

To know God; to love Him altogether; to live in the light of His countenance; to be satisfied with a little in some directions, because in others we have so much; to receive all things hopefully, because they are from Him; to take the peace of resting in His goodness; to desire all the day long. "Oh that my heart were as Thy heart, and that wholly!"—these are open to us.

—John Hamilton Thorn.

### A TIRED-OUT FEELING

Is a Sure Sign That the Blood Is Thin and Watery

"I am glad to have an opportunity of testifying to the benefits I derived from the use of Dr. Williams' Pink Pills," writes Mrs. Lawrence Kennedy, St. Joseph, N.B. She further says: "Some years ago I was working as a stenographer, and became badly run-down. I always had a tired-out feeling, had no appetite and suffered terribly from backache. Almost every month I had to remain from the office for a day or two. I was advised to try Dr. Williams' Pink Pills, and I have reason to be glad that I followed this advice. Before I had been taking the pills very long I began to feel much better. Continuing their use my strength came back, I regained my appetite and the terrible backache from which I had suffered disappeared. I have been married many years now and have two fine healthy children, a girl and a boy, and am in the best of health. All this I owe to Dr. Williams' famous Pink Pills, and I trust that these few lines may help some other weak, run-down person."

Many run-down people who will give this blood-building tonic a fair trial will find through its use new health and strength. You can get the pills from any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### What Could Be Clearer

Naughty little Jimmy had been eating green apples, so his mother had to call in the doctor.

"Now my little man," said the kind doctor, "tell me what you think is the matter with you?"

"It's like this, doctor," answered Jimmy from his bed of sickness. "you know how you feel when you don't know how you feel? Well, that's how I feel."

"I see you've given up teaching your wife to drive."

"Yes; we had an accident. I told her to release the clutch and she let go of the steering wheel."

### Minard's Liniment For Insect Bites.

Physicians are called upon to prescribe for the imagination more often than anything else.

A young lady seldom tires of trying to convert a bachelor to the annexation theory.

What many people call indigestion is very often merely excess acid in the stomach. The stomach nerves have been over-stimulated, and food sour. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

### Teeth and Health

Issued By The Canadian Dental Hygiene Council, Inc. Studied By The Saskatchewan Dental Society

### THE "GUM BOIL"

Your child has come running to you one day—suffering pain—and has pulled aside his lip to let you see an angry lump on his little jaw. And, since it was just as sore as a boil to touch, you called it a "gum boil."

Or, possibly he had not complained of any soreness then, but one day while scrubbing his teeth, you noticed this lump with a little swelling in the centre, reminding you for all the world of a miniature volcano.

And from the "crater," was running a thick yellowish substance, which you knew to be pus.

Now, what had caused this? Just one thing—a dead pulp.

Nor do you have far to seek for the offender, since usually you will find that the tooth just over this sore is badly decayed or broken down with perhaps just the stump remaining.

Then what should be done? For, of course, this condition should receive prompt treatment.

Should the tooth be not too badly decayed, your dentist will advise it to be taken out; but more often, it should be extracted after the inflammation has pretty well subsided.

Following this treatment, the gum heals over and you congratulate yourself that no harm has been done. But consider; already serious disturbances may have resulted, in the decayed tooth, and have destroyed the permanent tooth germ beneath, to say nothing of the train of evils from the premature extraction of the offending tooth; and from the drainage of the pus into the system during the progress of the disease.

How likely, then, have had the tooth received attention during the early stages of tooth decay.

### Canada a Melting Pot

People From Various Countries Contributing To Our Culture

"It is up to us to see to it, that the contributions of the different peoples coming to this country is melted into a composite whole, and we will build up a people that will be equal to the ancestry from which we came," declared Hon. Sam J. Latta, speaking before a huge gathering of Norsemen in convention at Saskatoon. The gathering took the form of a patriotic meeting. Mr. Latta explained that people from the various countries each contributed culture of those countries, and these contributions were all blended together here.

Relieves Asthma At Once. If you could read the thousands of unsolicited letters received by the makers of Dr. J. D. Kellogg's Asthma Remedy. All cases, incipient and chronic, are benefited by this great family remedy. Why suffer or experiment with worthless preparations when the genuine Kellogg's can be purchased everywhere.

Given Life Passes On Boats

Captain Kochi, Major Fitzmaurice, and Baron von Huenefeld, who made the first westward Atlantic flight in the Bremen, were presented with free passes for all the Hamburg-America Line boats for the rest of their lives by Director Boerger, at Hamburg.

We gather from the many articles in the newspapers that the secret of health is still a secret!

## When Pain Comes

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

**WHIPPET CARS**

If You Have Never Driven a Whippet, Call or Write us for a Demonstration.

We will be pleased to show you the remarkable Speed, Power, Smoothness, Safety and Comfort of this truly modern car that has proved absolutely satisfactory in the hands of the public for over two years.

The wonderful Ease of Control makes it the Ideal Car for the lady driver, and the roomy body is of ample size for five full-grown people.

**The Farmers Mutual Lumber Co., Ltd.**  
P. J. HARDY, Manager Irma, Alta.

**Main Street The Wastebasket**

Mrs. L. J. Gieson is visiting her daughter at Parkland, Alta. Ladies Aid will meet at the home of Mrs. A. G. Walker, Thursday, August 3rd. Everybody welcome.

Mr. W. Cole went to the Mannville hospital on Monday for a minor operation. He is expected home shortly.

Mr. and Mrs. Seton and children have been enjoying a motor trip to Banff and other points.

Mrs. Roy Whyte and daughter arrived from Vancouver the first of the week.

Mr. and Mrs. Brooks of Toronto called to see Mrs. Wright while on their way to Saskatoon from the coast.

Mr. and Mrs. D. P. A. McBeth, of Tessier, Saskatchewan, have been renewing acquaintances in the Irma district.

Mr. and Mrs. A. E. Knudson have sold their farm at Flatbush, Alta., and intend settling again in the Irma district.

Owing to the inclement weather the I. O. O. F. and Rebekahs picnic that had been planned for last Wednesday was postponed to a later date.

The agricultural society are putting down a well at the fair grounds and building new corrals which will be a great convenience for those who exhibit stock at the fair.

Mr. F. Peterson intends leaving next Wednesday for an extended trip with the provincial exhibit to several of the most important fairs in the Central States.

Mrs. E. LaCroix returned from Edmonton where she has been taking medical treatment for some weeks. We understand that Mrs. LaCroix is feeling a lot better than when she went to the City.

Good progress is being made with building the new power line to Irma. The polls are being placed leading to Irma and we expect the new current will be available within about six weeks.

The contractors are making good progress with the new theatre. Mr. Keifer we understand expects to have the seats in place next week and will probably open the new building about the middle of August.

Mr. Ross McFarland returned Tuesday evening after a two weeks trip to his old home in the east. Mr. McFarland reports having had a pleasant trip and that business conditions appear bright through the east.

The Irma Sunday school has received several donations of books for the library and are anxious to receive more. If you have any good books that you are through with and would like to have them placed in a good cause, see Mrs. Wright, or any of the Sunday school workers.

Mr. R. Larson, the Cockshutt and Oliver agent, received the first combine to be shipped to the Irma district, on Wednesday night. This new machine which is known as the Baldwin Gleaner, cuts and threshes the grain at the same time, thus saving the expense of binder twine and the extra handling of the straw and bundles.

**AUGUST "ROD AND GUN" AND CANADIAN SILVER FOX NEWS**

The August issue of "Rod and Gun and Canadian Silver Fox News," which is just published, contains a highly interesting collection of yarns and stories of outdoor Canada and hunting and fishing. In the list there is a very good story of a more unusual humorous type in "So, This is Moose Hunting" by John Richmond. The contents also include several articles of a conservation note, as well as useful information for hunters, fishermen and campers.

The Guns and Ammunition department, edited by C. S. Landis, includes much useful material for the gun crank, while anglers, outdoorsmen, campers and dogmen are well catered to in the special departments edited by well known authorities. The Canadian Silver Fox News section contains a very complete report of the annual meeting of the Canadian National Silver Fox Breeders' Association. "Rod and Gun and Canadian Silver Fox News" is published monthly by W. J. Taylor Limited, Woodstock, Ontario.

"Ah shuah does pity you," said a colored pugilist to his opponent, as they squared off. "Ah was born with boxin' gloves on."

"Maybe you was," retorted the other, "and Ah reckon you's goin' to die the same way."

The definition nowadays of a man who is down and out is one who can't buy a car on the installment plan.

The small boy is interested in having his sister get married, to the extent that it will give him all the ice cream he wants.

"Walter there's soup in this food," said a travelling man in a restaurant as Bruce. "Oh, that's all right," the waiter replied, "It's to wash the food down."

About now many folks go on vacation and get so exhausted that they have to come home and go back to work for a rest.

"If you insist upon knowing, there are two reasons for my refusing you," said a Jarrow girl to an Irma fellow who proposed last week. "And they are what?" he asked. "Yourself and another fellow," she replied.

The boys who say they do not need to go to school any longer, are usually the ones who need education the most.

"That's a fine dog you have there," said an Irishman to a pompous passenger who had a dog he was going to ship in the express car at the depot Monday. "What kind is it?" "It's a cross between an Irishman and an ape," the man replied. "Sure, then it's related to both of us," the Irishman replied.

The railroad wrecks are all carefully investigated, but when people wreck their lives, no effort may be made to find the cause and remove it.

"Isn't that arm of the lake around that neck of land beautiful?" remarked a young lady from Jarrow to her fellow while visiting at Birch Lake last Sunday. "Yes, but I'm more impressed with that boat hugging the shore," he replied.

"Waiter, there's a fly in my soup," said a patron in a Holden restaurant. "That's alright," replied the waiter, "he'll leave lots for you."

Etiquette hint:—It is not good form to chew tobacco when calling at a home in which there are expensive rugs. It makes the hostess nervous.

The girls could not possibly cook the beefsteak at home, but they can always produce some fudge for the boy friend.

Heard at the ladies social: "Have you heard the story, that's around about Mrs. ....?" "Heard it? why I started it."

"Do you think that I will be able to do anything with my voice," asked a Ryley girl of her new fellow after singing a song the other evening. "It might come in handy in case of a fire," he replied.

It is much safer for the men to tell their wives everything, as the women folks are sure to find it all out anyway.

Much discussion as to why girls leave home. One reason is that they can't afford to wash dishes when the world is clamoring to have them appear in the movies.

"Do make yourselves at home ladies," said a local hostess affably while giving a party recently. "I am at home myself and wish you all were."

"Most of the Killam girls that attend dances here prefer not to marry," said a local fellow. "How do you know?" he was asked. "I've asked them," he replied.

Heard at the dance: "Don't you think that Bruce girl is beautiful?" "Yes, God gave her her face, but she picked her nose."

"My father's a doctor, so I can be sick for nothing."

"Well, mine's a preacher so I can be good for nothing."

**"RED MEANS DANGER"**  
It happened when she said Good-bye, And then leaped o'er the height, The scarlet bloomers struck his eyes, And the four horse team took flight.

The driver lost his balance For he couldn't see quite clear; The team flew down the driveway Their eyeballs white with fear.

On straight into the sandbank— They piled up in a heap, And o'er the tangled debris The driver took a leap.

Then rushing to the rescue The scarlet bloomers came; They sped like flying lightning On down the dusty lane.

But everything was skookum-chuck She'd nearly had a fit; The guy who watched the bloomers Was never hurt a bit.

— "Cayuse."
